

IN DEFENSE OF YOUR HEALTH

Charge!

The Single Sharpest Weapon Against an Invisible Enemy

Major disruptions like COVID-19, despite the hardship they cause, give rise to innovation. MorningStar is leveraging the lessons of the pandemic to offer residents, families and team members more reason to trust in the safety under our roof. Here's proof *positive*.

Introducing the Electrostatic Sprayer—the ultimate weapon against our invisible enemy.

The electrostatic process strips away electrons from the molecular structure of a disinfectant solution, creating *positively charged molecules*. When finely misted over any surface, these positive particles completely surround any 3D object, coating the top, sides and underside from every angle. The distribution is flawless, with no pooling of the liquid and no need to wipe afterwards.

Bioesque is the botanical disinfectant we use in the electrostatic sprayer. The powerhouse ingredient is Thymox, an herbal extract, making the solution harmless to you, but deadly to infection disease. The **Kill Rate** is under 4 minutes against COVID-19, Norovirus, Seasonal Influenza and C. Diff. Colitis, and it eradicates 99.9% of bacteria, fungi and molds. Registered with the EPA.

NON-TOXIC

NON-CORROSIVE

NON-FLAMMABLE

BIODEGRADABLE

VOC FREE
